

List of questions

to be answered in the host's statement
for the International Climate Protection Fellowship Programm

Please answer the following questions in the order given to produce a 1 – 2 page host's statement **in English**. It should be accompanied by the signed confirmation of support. This information is important for the members of our international Selection Committee to better assess the qualification of an applicant.

- 1. Do you know the applicant personally, or are you in contact with anyone at her / his current institution?**
- 2. How do you rate the candidate's academic and/or professional career and performance?**
Please consider the following points: dedication, mobility, breadth of specialisation, future potential.
- 3. How do you rate the applicant's leadership potential? (For postdoctoral researchers and applicants who are in the process of doing a doctorate: Please also consider leadership potential in academia.)**
- 4. How do you rate the project plan the applicant has submitted?**
Please consider the following points: current relevance, originality, clarity of focus, (methodological) quality, feasibility at the host institution, chances of success in the period envisaged for sponsorship. **(For postdoctoral researchers and applicants who are in the process of doing a doctorate: How would you assess the innovation potential of the proposal for the further development of the candidate's discipline?)**
- 5. To what extent were you involved in drawing up the project plan the applicant has submitted?**
- 6. Does the applicant have the language skills necessary to carry out the project successfully?**
- 7. To what extent are the expected results from the proposed stay as well as the applied methods and techniques of relevance to the field of climate protection and climate-related resource conservation in the candidate's country of origin?**

Only required for postdoctoral researchers or applicants who are in the process of doing a doctorate.

- 8. How do you rate the quality of the applicant's key publications?**
Please consider the following points: originality, innovativeness, impact on the continued development of the field, candidate's personal contribution (multiple authorship).
